360° PRINT (DIGITAL OR SILKSCREEN)

We strive to deliver 100% of the quantities ordered by our customers. However, we reserve the right to subject these quantities to a 5% variation in the actual quantity delivered.

REQUIREMENTS AND SPECIFICATIONS

TO CUSTOMIZE YOUR BOTTLE, SIMPLY FOLLOW THESE STEPS:

STEP 1: **REQUEST A CUSTOMIZATION TEMPLATE**

To request a customization template, simply contact us and let us know which bottle model you want to customize. We will send you the template as soon as possible.

STEP 2: **CREATE YOUR DESIGN**

Once you have received the customization template, you can start creating your design.

When creating your design, be sure to respect the printable areas. These areas are indicated on the template. If you place your design outside of the printable areas, it will not be printed correctly.

Please read the [MANDATORY FILE REQUIREMENTS](#) and [COLORS](#) sections carefully. These sections provide information about the file formats and colors that we support.

STEP 3: **SEND US YOUR DESIGN**

Once you have created your design, you can send it to us. You can do this by email, or send it to us via a file-sharing service.

Please note that the required fields on the template must be filled in before you send it to us. This information is essential for us to process your order and customize your bottle correctly.

If the files you send do not meet the mandatory requirements, we may charge an additional cost to correct the files.

If you do not have the means to create your own design and complete the template, we can do it for you. However, there is an additional cost for this service.

MANDATORY FILE REQUIREMENTS

We require **vector files** for all submissions. Acceptable vector file formats are .AI, .EPS, .SVG, .PDF. If you are unable to provide vector files, **high-resolution image files** (300 dpi at actual size) are also acceptable. Acceptable file formats are .PSD, .TIFF, .JEPG.

COLORS

To ensure that your artwork prints in the desired colors, it is essential that you provide Pantone Color numbers. Use solid colors from Pantone color books. Fluorescent colors cannot be used.

DIGITAL PRINT

Metallic colors cannot be reproduced in digital printing.

NO COLOR LIMIT: This type of printing uses CMYK composite colors, so we cannot guarantee a perfect match to Pantone colors. However, we recommend providing Pantone colors so that we can get as close as possible to your desired colors.

SILKSCREEN

Avoid shadows, gradients, transparencies, or other effects to ensure the expected result.

COLOR LIMIT: We recommend a limit of 4 colors. Slight color misalignment may occur. Minimize this effect by reducing the number of colors. Light colors printed on dark bottles will appear darker. For best results, a white ink base will be required and this should be considered in the color count.

PAD PRINTING

Shadows, gradients, transparencies, or other effects cannot be reproduce.

COLOR LIMIT: We recommend a limit of 2 colors.
