## DISCOVER THE NEW 2022 CATALOGUE!

We are pleased that you are holding the new ABUS General Catalog 2022 in your hands and for it to provide you with an overview of our existing products as well as new products.

We are continuously striving to optimize the catalog. From now on, you will find an overview of all related products at the beginning of each chapter for a better overview. The page number on which the product can be found is indicated, allowing you to navigate even faster to the respective product.

We have redesigned the helmet chapter so that you can now find all colors of a product on one page and no longer have to scroll.

As usual, you will also find additional pages on helpful and exciting topics.

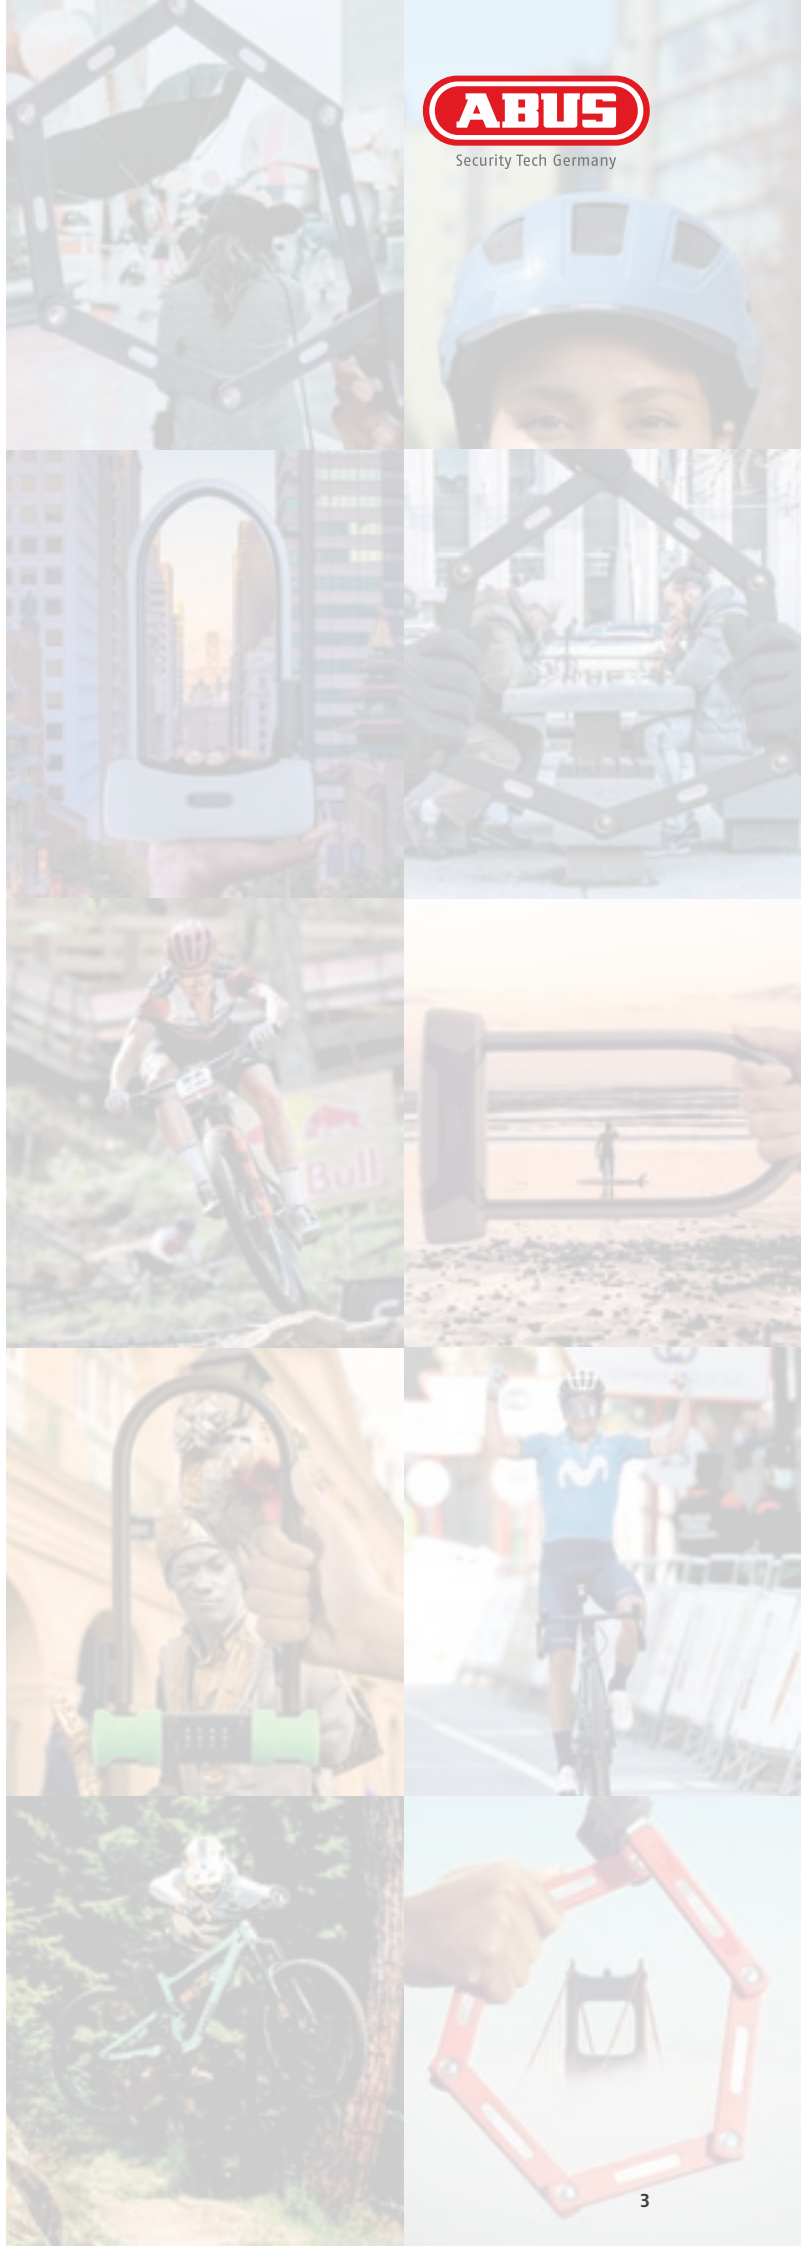

We hope that you will enjoy working with the catalog every day and that it will serve as a helpful basis for your work.

Product and milieu photos as well as logos and lifestyle images are also available for convenient download.

## 6 REASONS TO TAKE A COURSE WITH US

The current situation shows how important it is to offer different training formats in order to diversify. Online training as an indispensable supplement to face-to-face seminars has become an essential part of life now.

You can find an overview of our seminar offerings on our Academy homepage: [myagi.com/s/abusinternational](https://myagi.com/s/abusinternational)

### **MORE SALES FOR YOUR BUSINESS**

As much input as possible for the sale and professional consultation of security products - that is the concept and goal of ABUS training courses. This directly boosts your sales success and in turn directly brings higher sales.

### **FROM THE INDUSTRY, FOR THE INDUSTRY**

The trainers at the ABUS Academy have been in the industry for a long time and draw on a wide range of expertise, which is constantly adapted to current conditions and goes far beyond the actual product training.

### **COMPREHENSIVE ACADEMY OFFERINGS**

The offers of the ABUS Academy range from product training to sales training, personal development and management training, or entrepreneurial coaching. Continuing education all in one place.

### **LEARNING IN A RELAXED ATMOSPHERE**

It's not just expertise that's important to us. The transfer of knowledge is also enriched with many practical examples, interesting group work and other didactic measures, to make learning at ABUS enjoyable. In this way, we also ensure the transfer of learning in the long term.

### **SUPPLEMENTS AND ENSURING LEARNING SUCCESS IN THE LONG TERM**

Even after our seminars are over, we don't leave you on your own. Through the webinars we offer, you can find further content or discuss the experiences you gained from the seminar and customer practice with your advisor again.

### **DIGITAL COMBINED WITH PRESENCE**

Webinars, online clips combined with classroom training. Consolidate what you have learned digitally afterwards or use the offer to prepare for your seminar. Independent of deadlines, always up to date in terms of product technology.

# ABUS - MADE IN GERMANY

When August Bremicker and his sons founded ABUS in 1924, they had a lot of experience with engineering and craftsmanship – as well as a very clear vision: They wanted to create products that protected human life and property. It was a far-sighted corporate guideline – paired with an expectation for quality right from the start. It was the start of a continuous success story. The ABUS brand became a synonym for security world-wide.

## HIGH-QUALITY MATERIALS

To be able to offer consistently high quality and security against every type of brutal and intelligent attack technique, we use the highest-quality materials at every price level. Complex hardening processes guarantee the best resistance in our materials. Our internal quality management check all materials before and during the production process to ensure every product has the high quality you demand.

## THE KEY TO SUCCESS

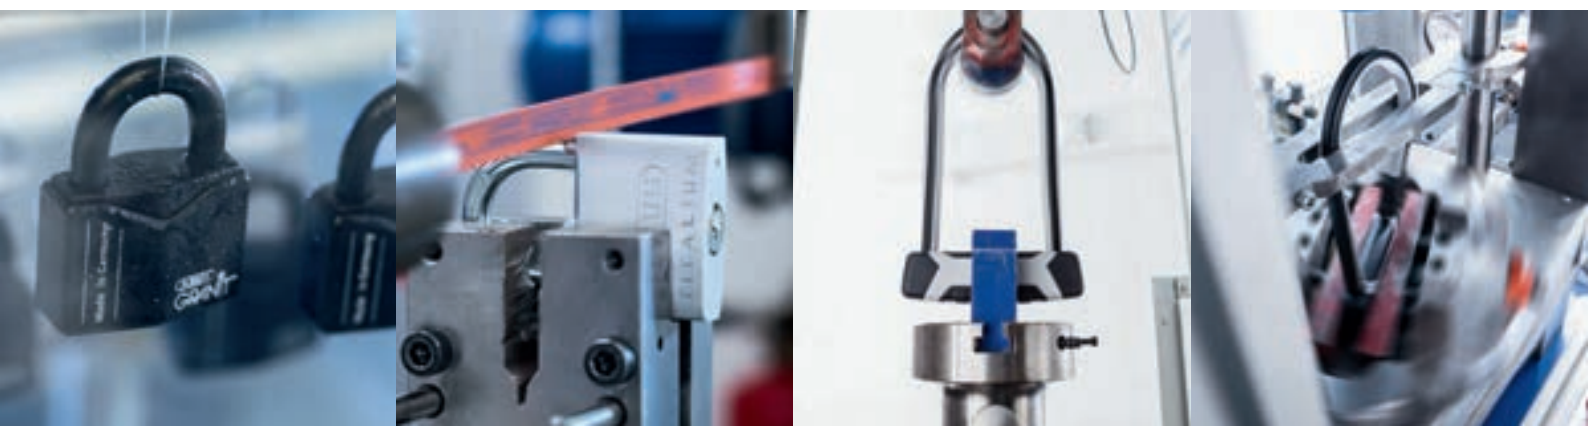

At ABUS, we design and build the tools and machines used in the production of our products in-house. That bundles knowhow, guarantees jobs, and strengthens identification. Our own engineering and toolmaking department concentrates exclusively on the development of bicycle and motorcycle locks. This ensures that we meet the tough requirements you place on your bicycle or motorcycle lock every day.

## ENSURING CONSISTENCY

In our own ABUS test laboratory, we routinely carry out tests and attacks on our products to ensure our products offer consistently high quality.

Among others we make sure our locks are resistant to:

- Ice spray attacks and freezing conditions at  $-40^{\circ}\text{C}$
- Twisting, pulling, hammering and sawing attacks with help of our manual or mechanical tests
- Rust by simulating highly corrosive weather conditions

# APPROVALS

ABUS locks are tested and approved by independent, neutral testing institutions in a number of European countries. As every test lab use different tools, techniques and machines to test both security and quality we are very proud of the high number of different approvals given to ABUS products. If a lock can pass the varying test requirements in many different countries you can be sure it is of the highest possible quality and security.

The following seals of approval confirm the outstanding security of ABUS cycle locks:

Svenska Stöldskyddsföreningen  
Stockholm, Sweden

Norges Forsikringsforbund  
Oslo, Norway

Dansk Varefakta Naevn  
Copenhagen, Danmark

Finanssiala  
Helsinki, Finland

ART (ANWB, RAI, Theft Insurers)  
Helmond, The Netherlands

Sold Secure  
Northants, Great Britain

Test Seal OSIMZ  
Moscow, Russia

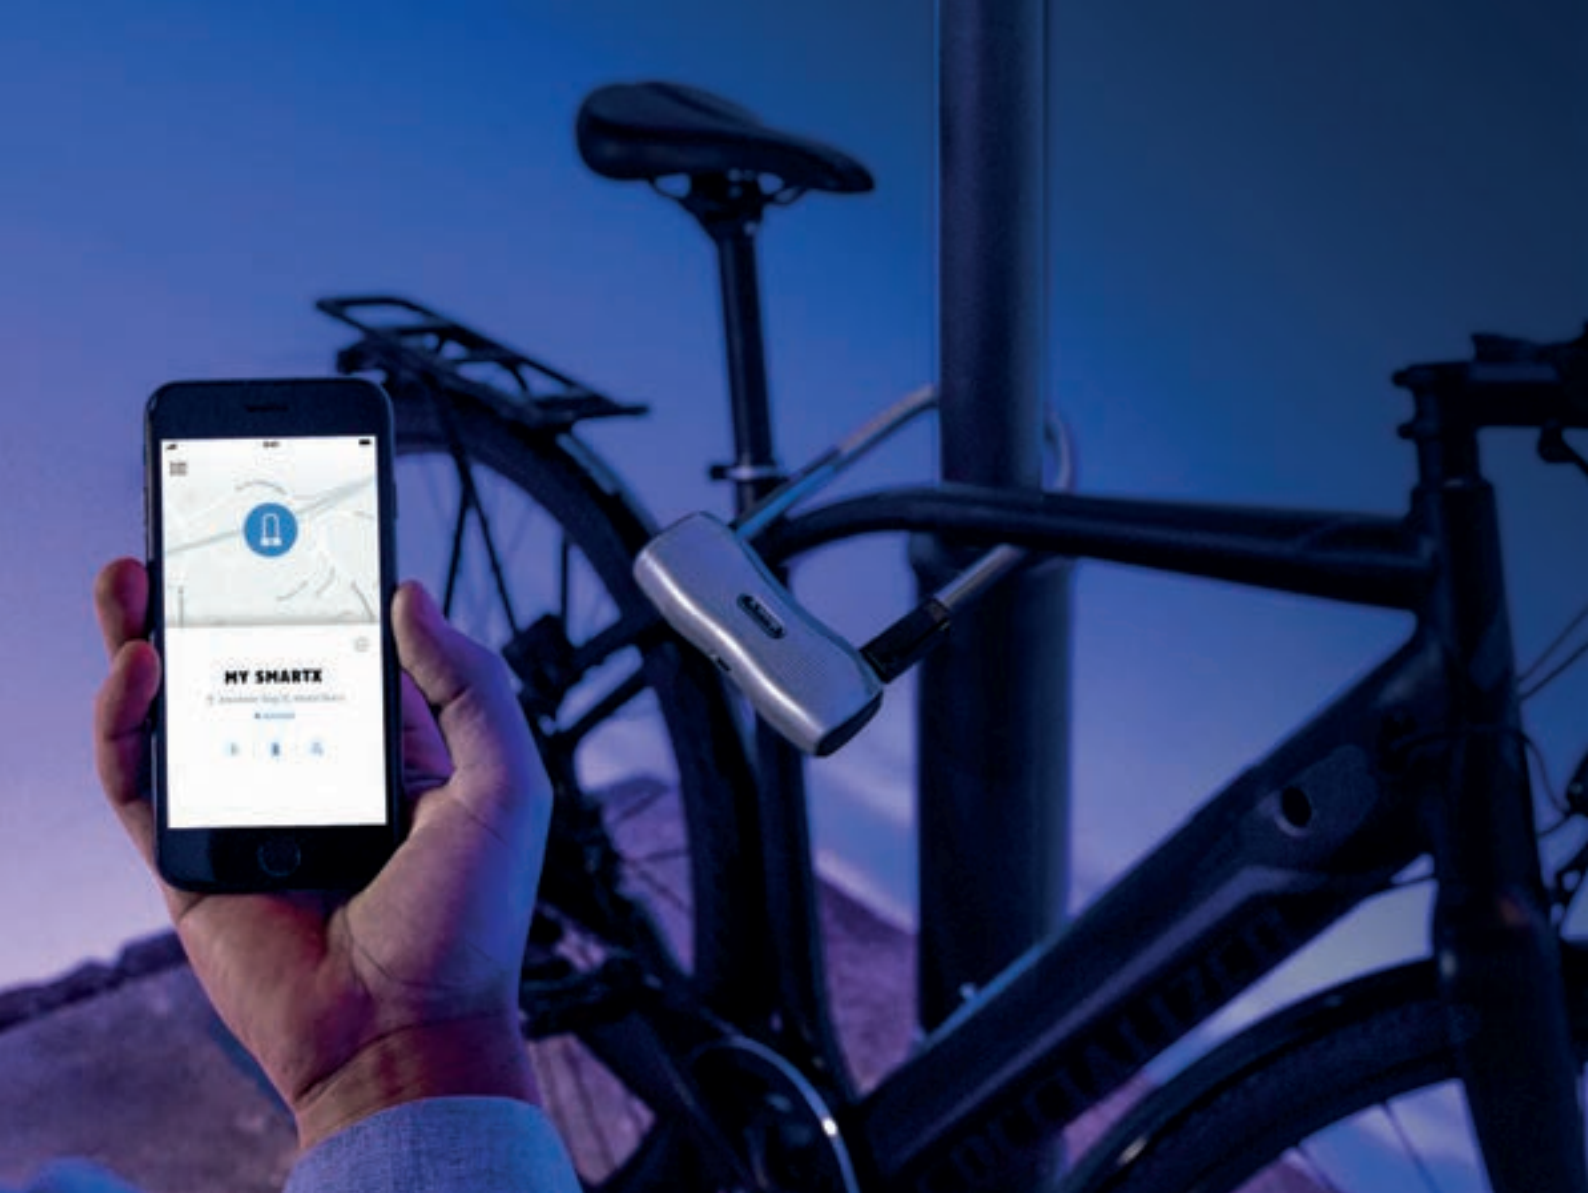

Test Seal VdS

## KEYLESS IS MORE

Don't live in the past. With SmartX™ locks, the smartphone becomes the key. Open and close via Bluetooth. Convenience like never before thanks to the latest keyless technology - with the maximum security you're used to.

### KEYLESS

Your smartphone becomes the key: A keycard connects the corresponding ABUS app (iOS or Android) to the lock.

### BLUETOOTH®

The lock receives encrypted signals from the smartphone - just as secure as the lock itself and more individualized than any key.

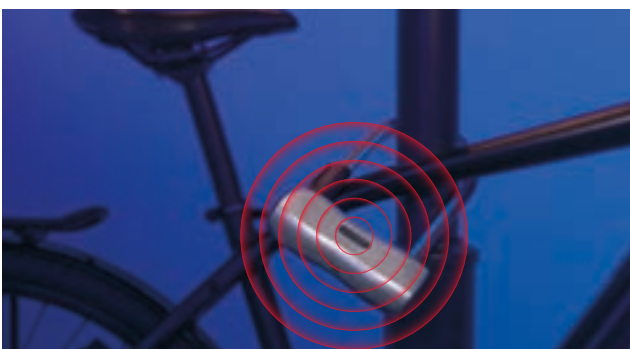

## OUR ASSORTMENT

Made in Germany

### SMARTX APP

Each Bordo 6500 SmartX™ can be used by multiple persons. The decision whether a person is granted time limited or permanent access is up to the administrator. For the cargo bicycle behind the house or the children's trailer at the nursery – this is how families lock in the twenty-first century!

### ALARM

With the integrated alarm function, our SmartX™ products offer added security.

The 3D Position Detection detects slightest movements and triggers a deterrent alarm.

If slightly moved, the lock issues only a short warning sound. But if the sensors detect a theft attempt, the alarm sound increases its volume to a deafening 100 decibels.

### AT A GLANCE

### GRANIT™ Extreme 59

Originating from our motorcycle range, the Granit Extreme is the toughest ABUS U-lock available. The massive 16mm square shackle is practically impossible to cut with hand-tools. With a square interface anchoring the shackle to two independent power cells, every attacker needs to break the lock twice to take your bike. With over 1 million key codes intelligent picking attacks are equally futile. Need the ultimate two-wheeled security? You are in the right place.

### BORDO 6500A SmartX™

Enjoy the advantages of the innovative, hands-free SmartX cylinder and turn your iOS or Android smartphone into your individual key. Combined with the 100 dB alarm, this lock offers the highest level of security for high-quality e-bikes and cargo bikes. If you want it less smart but still comfortable, you can also control the BORDO 6500A SmartX with the remote control (RC version).

- SmartX™ locking system with Bluetooth – high-quality, keyless locking offers user-friendly operation
- Alarm function with at least 100 dB for 15 seconds followed by automatic reactivation
- 3D Position Detection – detects vibrations and the smallest movement in all three dimensions and triggers the alarm
- Smart alarm – the lock only emits a small warning beep in the event of minor and brief vibrations, e.g. if a football bounces against the bike
- USB-C port
- App connection
- Location storage of the bike's last parking location
- LED light shows battery- and charging-status
- Also available with remote control (RC version)
- Incl. bracket (SH)

### BORDO GRANIT™ 6500KA

We combine the proven 3D sensitive alarm system with an advanced security category. This makes the toughest ABUS folding lock on the market now even more robust. Thanks to the intelligent ABUS alarm system, your neighbors will no longer be exasperated by constant false alarms. Only when an attack is suspected does the full alarm activate - accidental bumps and movements, on the other hand, only trigger a brief, 5-second warning.

## **BORDO 6000PZ: THE BIKE LOCK FOR THE FRONT DOOR KEY**

Like no other company, ABUS stands for security - at home or on the road.  
Now ABUS combines these two worlds in one product and presents a true innovation with the BORDO 6000PZ:

The proven folding lock is now available with a profile cylinder:  
The first bike lock that can be opened with the front door key.

A key for everything that needs to be secure.

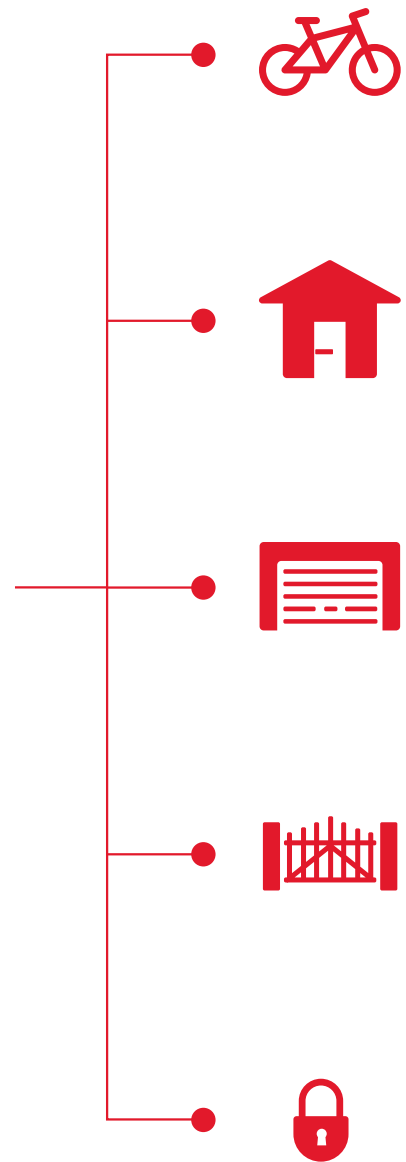

### **MANY APPLICATIONS - 1 KEY.**

It's quite simple:

The customer wants to have their Bordo keyed alike with their front door key?  
This is now easily possible.

1. Either the BORDO is made to match the existing front door cylinder or the front door cylinder is adapted to the BORDO.
2. Operate everything with one key!

# FRAME LOCKS

We want to help you find the right frame lock for your customer's bike even faster in the future. The dimensioning below should help you with this.

Please also ask your ABUS contact for a custom gage (item no.: 90342). The template is designed so that you can put it in the right place on the tire and directly read which lock is the right one.

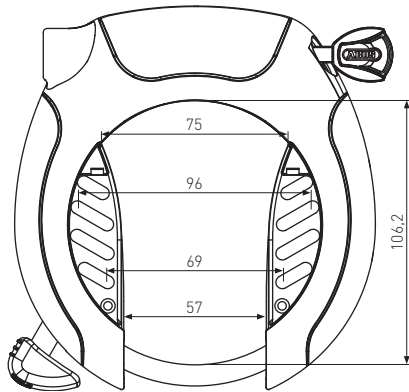

- a Maximum fender width
- b Maximum hole spacing of rear mounting points
- c Minimum hole spacing of rear mounting points
- d Maximum tire width
- e Maximum clearance heights (top of fender vs rim)

You will find an overview of all dimensions on the next page. In addition, you will also find all relevant dimensions on each product page in the tables.

### WCH

The new wall chain anchor neatly integrates anchor and chain into a high-security system - safer, more cost-effective and easier to use. On request, we can build a WCH to match your existing XPlus key code. WCH chains are available in different lengths to suit your needs. And if your bike collection grows, you can even link several Wall chains together.

#### SportFlex 2504

With the SportFlex you always have a lock with you as a performance-oriented rider - mounted between the frame and bottle cage. The SportFlex deploys a flexible 2.4 mm cable that is 90 cm long - perfect for securing your road bike to available objects such as bike racks or lanterns. The extendable cable lock is compatible with all carbon frames. Thanks to its practical numerical code lock, you are no longer required to carry a key. Knowing that your high-quality bike is protected from opportunistic thieves, you can be more relaxed during short stops.

## INDIVIDUAL SOLUTIONS FOR YOUR ABUS BICYCLE LOCKS

Our locks are designed to protect people's belongings. Just the way you want. Different security levels, shapes, colors - our range offers a wide choice for every bike and the preferences of the proud owner.

We have therefore developed a new presentation system to provide you with optimum support in advising your customers and to make it easier for them to find their way around your store.

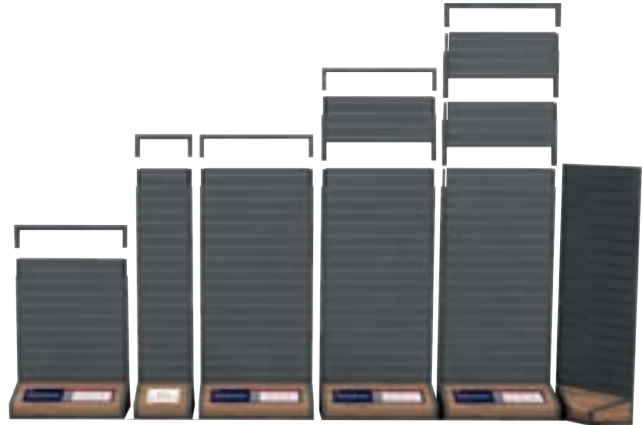

**WE HELP YOU SELL**

Your needs as a retailer are very close to our hearts. Our new presentation system is therefore designed to reflect the ABUS brand in the best possible way, while giving you the freedom to suit your sales strategy and salesrooms.

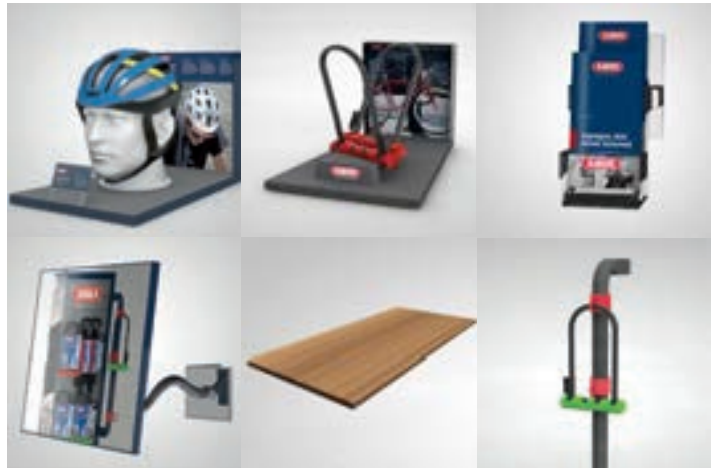

**MODULAR STRUCTURE:**

Height, width, product placement, placement in the room, in the corner or on the wall - you decide.

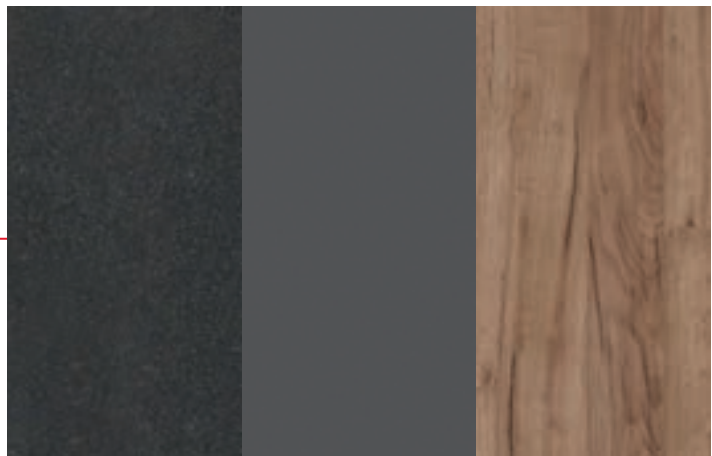

**NUMEROUS ADD-ONS:**

Generate attention, categorize, inform - combine the tools as you need them.

**MODERN DESIGN:**

Metal and wood elements combined in a downscaled "handmade" look - the design concept of your store will not be disrupted.

## ONE KEY™ SIMPLE. INDIVIDUAL.

### HAVE CUSTOM BIKE LOCKS MADE - OPERATE EVERYTHING WITH JUST ONE KEY!

A lock for connecting, a frame lock, a padlock, and even a battery lock for e-bikes - if you want to secure your bike properly, you need a lot of locks. That is why we at ABUS, with the ONE KEY system, offer the ability to produce locks for your customers in such a way that they can all be operated with one key. No mess, no looking for keys.

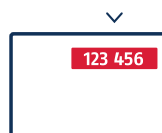

### HOW ONE KEY™ WORKS

It's quite simple. Each ABUS lock has an individual key code with which spare keys or matching "keyed alike" locks can be made - even years after purchase. All that matters is that the locks from ABUS have the same type of cylinder installed.

### HERE'S HOW IT WORKS

The order is conveniently placed via the Partner-Portal.

1. Read key code from code card

2. Choose suitable products at your retailer

3. 1 week to manufacture your custom product

4. Pick up at retailer or ship to home

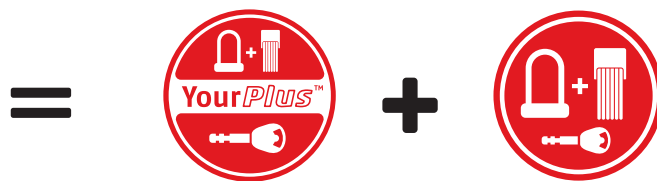

## FAMILIAR FACE – NEW DESIGN

As a manufacturer of cylinders and bicycle locks, ABUS has the unique opportunity on the market to manufacture custom locks so that they can all be operated with one key – or “keyed alike”. It is important that the locks be compatible with each other for this purpose.

So far we have marked our products and campaigns with these icons:

With YourPlus™, we have combined all locks that have a Plus cylinder.

This icon currently indicates that this lock can be keyed alike.

**FROM NOW ON, WE’RE BRINGING EVERYTHING TOGETHER UNDER ONE KEY™ – A CLEAR PROMISE FOR MORE CONVENIENCE.**

# THE ABUS LEVEL SYSTEM

Finding the right lock for your customer requires a few questions that can help in the selection process. A lock must not only be secure, it must also suit the user.

The questions below can help you figure out what your customer is looking for:

In the sales conversation, you get the best feel for your customer and a sense for what they value.

Many questions are rather soft factors and have an influence on the choice of the lock, but not so much on the choice of the appropriate security level.

The most significant factors impacting the level of safety are certainly the parking location and the amount of time the bike will be left there.

For this, we recommend the following reference:

		WHERE WILL YOUR BIKE BE PARKED?					
		Downtown/major city		Small town/village		Rural area	
HOW LONG WILL THE BIKE BE LEFT UNATTENDED?	Over night						
	Longer						
	Short time						

## ABUS OEM

### **STRONG SERVICE PARTNER, RELIABLE SUPPLIER ABUS AS OEM PARTNER – YOUR FIRST CHOICE**

In the bicycle market, the factors of success are added value, differentiation, flexibility, availability, fast service and high capacity. Suppliers that work with bicycle manufacturers have to meet the corresponding requirements. ABUS does meet them.

As a globally experienced specialist in mobile security, we offer you the best possible support and a high level of reliability. For years, ABUS has been a synonym for security, and has earned a leading position in the bicycle accessory market.

Quality „Made in Germany“ and „Just in time“ deliveries: concentrating on these core competences has made us an important partner for many bicycle manufacturers worldwide. We are also a strong partner on the OEM market, offering a wide selection of frame locks, integrated security solutions, and many individual products. Among others, we offer keyed alike locks and battery cylinders for e-bikes.

Allow us to take advantage of mutual synergy and implement it to our shared success!

Our OEM team looks forward to hearing from you at: [oem@abus.de](mailto:oem@abus.de)

We hope to continue our good cooperation with leading bicycle manufacturers!

## ABUS QUIN SYSTEM CRASH DETECTION

Alone on your bike, exploring or shredding down single-track, surrounded by mesmerizing landscapes. A unique experience that requires maximum concentration, technical ability, and excellent endurance. But even if you possess all these skills, a crash can always happen. In the worst-case scenario getting help fast is vital. Thanks to the ABUS QUIN system, your bicycle helmet now springs to the rescue.

QUIN is your personal emergency call center in your helmet. This means that the ABUS QUIN helmets now have an integrated accelerometer that detects and measures accidents. In the event of a fall, the system notifies a previously selected person and sends them the location data of the person who has fallen via tracking. They are then able to coordinate a rescue. However, not every emergency is necessarily a crash.

In the event of other dangers or a breakdown, quick help is also desirable. This is why the ABUS QUIN system can also be triggered manually.

ABUS QUIN helmets not only provide excellent protection, they are also an invisible companion! So, never go without an ABUS QUIN helmet again:  
NEVER BIKE ALONE!

### CRASH DETECTION – HOW IT WORKS

The QUIN is automatically activated as soon as the helmet begins moving. During the ride, the QUIN chip continuously measures the movements of the helmet.

If a fall or crash occurs, the crash detection triggers the emergency situation procedure on your smartphone via Bluetooth signal. You will be given a sufficient amount of time to respond.

If the accident is minor, the emergency situation procedure can be stopped and deactivated manually using the QUIN app.

If this does not happen, a notification that includes GPS coordinates will be sent to emergency contacts via text message, e-mail or push function to coordinate rescue assistance.

### SOS BEACON – THE MANUAL ALARM

The alarm can also be manually triggered in any dangerous situation, independently from crash detection. Just tap the side of your helmet four times – and the emergency situation procedure begins.

FURTHER INFORMATION AVAILABLE AT:  
[ABUS.COM/QUIN](https://www.abus.com/quin)

## THE QUIN CHIP

The heart of the QUIN system is the QUIN chip.

It uses a complex algorithm measuring and constantly evaluating factors such as impacts, changes in speed, vibrations, variations in rotation and changes in linear inertia.

## RECHARGEABLE BATTERY

Four-hour fast charge mode via Micro USB a battery service life of up to one month.

## CRASH SENSOR SYSTEM

Five control sensors constantly evaluate data during use and detect crash situations.

## RAISE TO WAKE

Automatic pairing of the QUIN helmet and smartphone as soon as the QUIN chip detects movement.

## BLUETOOTH 5.0

Guaranteed wireless range of 20 meters, ensuring a stable smartphone connection.

## THE APP

The QUIN app - for iOS and Android - is the interface between the helmet and its user, who uses it to control all the functions of the ABUS QUIN system.

Here, for instance, you define the contacts to be notified in case of emergency.

## NOTE

Free registration is required to use the Quin for ABUS app. Additional services that are subject to a charge can be added or canceled at any time.

Quin Chip and the Quin App form a communication unit and constantly compare data during use to detect a possible crash.

## INDIVIDUAL SOLUTIONS FOR YOUR ABUS HELMETS

The design of our bicycle helmets focuses on people and their needs. And these are just as colorful as the world of bicycles. Whether cross biking or commuting downtown, our diverse range has something for everyone.

We have therefore developed a new presentation system to provide you with optimum support in advising your customers and to make it easier for them to find their way around your store.

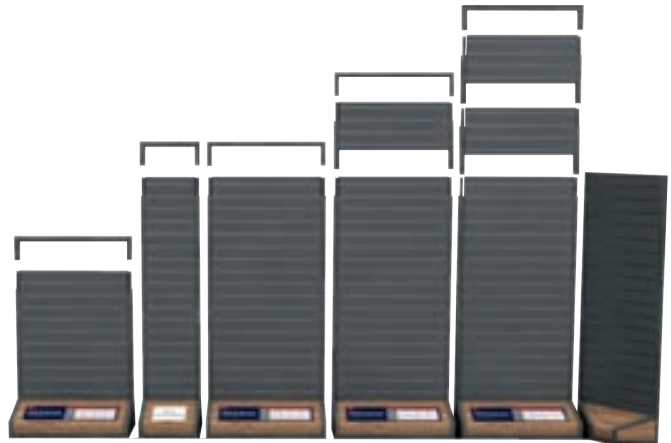

**WE HELP YOU SELL**

Your needs as a retailer are very close to our hearts. Our new presentation system is therefore designed to reflect the ABUS brand in the best possible way, while giving you the freedom to suit your sales strategy and salesrooms.

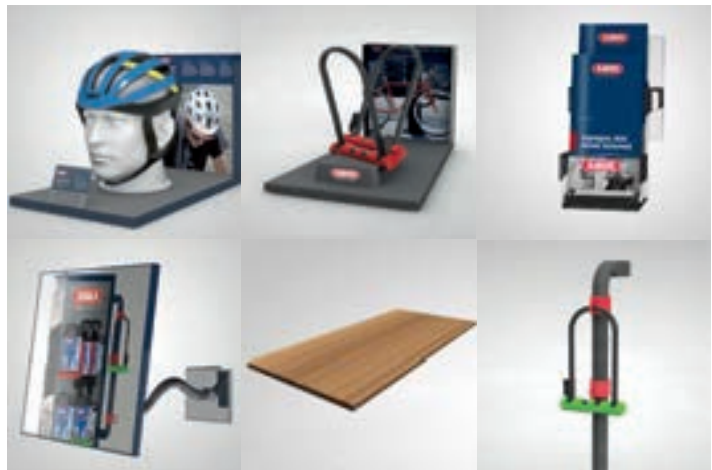

**MODULAR STRUCTURE:**

Height, width, product placement, placement in the room, in the corner or on the wall - you decide.

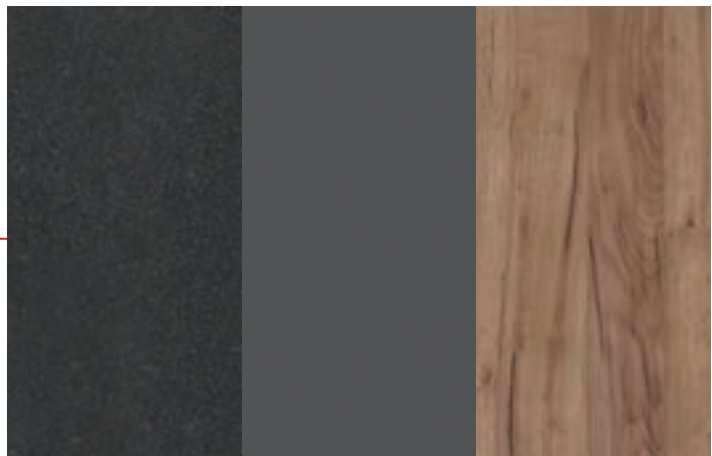

**NUMEROUS ADD-ONS:**

Generate attention, categorize, inform - combine the tools as you need them.

**MODERN DESIGN:**

Metal and wood elements combined in a downscaled „handmade“ look - the design concept of your store will not be disturbed.
